## **Azima DLI Wins a *Plant Engineering* 2009 Product of the Year Award**

*DCA-60 Vibration Data Collector Recognized With a Bronze Award in the Maintenance Tools and Equipment Category*

**WOBURN, Mass. – April 15, 2010** – [Azima DLI](#), the leader and premier provider of predictive machine condition monitoring and analysis services, today announced its DCA-60™ [vibration data collector](#) and real-time analyzer has won a 2009 Product of the Year Award from *Plant Engineering*. The DCA-60 was recognized with a Bronze award in the Maintenance Tools and Equipment category.

Winners were announced at the annual Product of the Year dinner, part of the 2010 Manufacturing/ Automation Summit. The event recognized more than 50 of the best new products in 17 categories. Winners were voted on by the readers of *Plant Engineering* magazine.

Azima DLI's DCA-60 enables plant technicians to collect vibration data and diagnose machine faults onsite or via the Internet-based WATCHMAN Reliability Portal™. The DCA-60 features embedded ALERT™ machine vibration analysis software to support machine diagnostics in the field. Additionally, when the DCA-60 is connected to a plant's local network through Ethernet or Wi-Fi, technicians have direct access to Azima DLI support specialists to consult on specific questions or challenges. Additionally, as part of an ongoing strategic predictive maintenance program, the DCA-60's capabilities can be upgraded and evolve as plants' condition monitoring needs change.

"With *Plant Engineering* readers voting on these awards, we know the benefits of the DCA-60 are being recognized by individuals who understand the true value and importance of being empowered to make timely maintenance decisions by reliable machinery health information," said Jonathan Hakim, president, Azima DLI. "The DCA-60 continues to be an important element of our customers' condition monitoring programs, with powerful data collection and analysis capabilities that play an important role in our WATCHMAN Reliability Service Plans."

### **About Azima DLI**

[Azima DLI](#) is the leader and premier provider of predictive machine condition monitoring and analysis services that align with customers' high standards for reliability, availability and uptime. Azima DLI's [WATCHMAN™ Reliability Services](#) utilize flexible deployment models, proven diagnostic software and unmatched analytical expertise to deliver sustainable, scalable and cost-effective condition-based maintenance programs. The company's bundled solutions enable customers to choose comprehensive, proven programs that ensure asset availability and maximize productivity. Azima DLI is headquartered in Woburn, Massachusetts with offices

across the U.S. and international representation in Asia-Pacific, Central America, Europe and South America. For more information, call +1 (800) 482-2290 or visit <http://www.azimadli.com>.
