

For Immediate Release

## **Azima DLI Details Participation at RCM-2010 and Promotes its Machine Condition Monitoring “Don’t Roll the Dice” Campaign**

*Event Attendees Get a Sneak Peek at the New Sprite Roamer Portable Remote Monitor and Learn More About the Benefits of Azima DLI’s WATCHMAN Reliability Service Plans*

**WOBURN, Mass. – April 13, 2010 – [Azima DLI](#)**, the leader and premier provider of predictive machine condition monitoring and analysis services, today announced details of its participation at [RCM-2010](#) where it will promote greater awareness about how to develop successful, sustainable condition monitoring programs. In support of its “Don’t Roll the Dice” campaign, Azima DLI will showcase its innovative [WATCHMAN™ Reliability Service Plans](#) and offer demonstrations of the latest versions of its [WATCHMAN Reliability Portal™](#) and [Sprite Roamer™](#) portable remote monitor at booth #208. The Reliability Centered Maintenance Managers Forum is part of the [Reliability 2.0](#) conference which is taking place April 20-22 in Fort Lauderdale, Florida.

For the first time, Azima DLI will be previewing its soon-to-be-released Sprite Roamer portable online monitoring unit. The Sprite Roamer is an integral component of the new WATCHMAN Intensive Care™ services, which allow plant personnel to quickly initiate online monitoring of machines that are in trouble or during run-in, where intensive monitoring is required. The Sprite Roamer enables automated measurement of 10 channels of vibration data and a tachometer, and is coupled to the WATCHMAN Reliability Portal™ via cellular networking so Azima DLI’s critical care analysts and plant staff can monitor the machine’s health closely in near real-time when it is engaged.

**WATCHMAN Reliability Service Plans for Lean and Reliable Plant Operations**  
Plants have been hit hard by a number of macroeconomic and skills shortage issues over the past few years. This combination of market factors has challenged plants’ ability to launch effective programs or retain the expert analysis resources necessary to keep existing condition monitoring programs running smoothly. Azima DLI’s three all-inclusive WATCHMAN Reliability Service Plans – [WATCHMAN Professional](#), [WATCHMAN Insight](#) and [WATCHMAN Select](#) – provide manufacturers with the ability to forego the complexity of traditional à la carte maintenance programs through comprehensive, pre-packaged solutions that are tailored to address specific requirements for lean and reliable plant operations.

The WATCHMAN Reliability Portal 2.0 is an important component of the WATCHMAN Reliability Service Plans. The web-based WATCHMAN Reliability Portal empower plants with key features and functionality including the ability to monitor program and data acquisition performance from any location, track machine health and

fault progression over time, and quickly view plant health with machine summary reports.

“RCM-2010 is one of the top condition monitoring events of the year and the perfect place to showcase our innovative solutions,” said Azima DLI President Jonathan Hakim. “Maintenance professionals are under a lot of stress due to limited resources and Azima DLI’s services and technology are a great way for them to uphold the equipment reliability and uptime standards they have worked so hard to preserve.”
