## **Azima DLI Opens Expanded Seattle Office**

*Global Machine Condition Monitoring Services Company Relocates its Washington State Office to Accommodate Future Business Growth*

**WOBURN, Mass. – August 11, 2009** – Global condition monitoring services company [Azima DLI](#) today announced it has relocated its Seattle office to better accommodate the company's future growth. Previously based on Bainbridge Island, Azima DLI has opened new space in Poulsbo, Washington.

The Seattle office is home to the Azima DLI Government Services division that works with high-profile military customers including US Navy Aircraft Carriers, Military Sealift Command, US Army Corp of Engineers and the US Coast Guard. The office also includes a number of the company's core sales, development and engineering team members who focus on industries such as power, paper, petroleum, automotive and aerospace. The company had been at its Bainbridge Island location for more than 25 years.

"This move represents a new era for our Seattle team, many of whom have been commuting to and working at the Bainbridge Island office for several years," said Joe Van Dyke, president of the Government Services Division, Azima DLI. "The modern office space and new IT infrastructure give us the flexibility needed to expand operations while continuing to deliver the premium levels of service, innovation and reliability our customers have come to expect. It is also a 'green' move, reducing the commute distance for more than half of our current workforce."

### **About Azima DLI**

[Azima DLI](#) is the only global condition monitoring services company exclusively focused on delivering accurate and timely equipment diagnostics to industrial plants, transportation organizations and the military. Azima DLI's expert analysts, advanced software and flexible, Web-based delivery model provide customers with the information they need for insightful decision making that lowers maintenance costs and improves industrial reliability.
